

Klick Monster

Aggressive, untameable and adrenaline-fuelled!

Klick Monster is the XXL Klick. Powered by a 1500W motor it devours even the most difficult trails.

Its oversized wheel, coupled with two fat wheels mounted on the wheelchair, turns a very ordinary weekend into an epic experience, a trip into an explosion of emotions.

Total freedom and heart at 1000.

Intelligent Cruise Control

Thanks to the Intelligent Cruise Control you can set your favourite speed and the Klick will maintain it both uphill and downhill. Perfect for your excursions with friends or for an even more comfortable ride.

EBS - Electronic Brake System

The built-in Electronic Brake System (EBS) allows you to brake electronically using the dedicated brake button or simply by operating the first part of the brake lever. It is always possible to apply the mechanical brake simply by squeezing the lever further.

EBS technology will recover energy from braking and use it to automatically recharge part of your battery.

LCD-Display

The new and innovative coloured Klaxon® display is full of new features to customise the performance of your device. Your Klick will be even safer thanks to the anti-theft technology: protected by a unique password provided by Klaxon upon the product's reception!

Handlebar

The **Standard** handlebar is equipped with a parking brake system that keeps the Klick braked when not in motion.

«This is the heavy heavy monster sound
The nuttiest sound around» - Madness

Data

Material	Aluminium
Motor	48V x 1500W brushless
Handlebar	Standard: Aluminium, adjustable in height, depth and angle
Size	W 50 cm x H 90 cm x D 50 cm
Weight	15 kg (battery excluded)
